

Post Hardware-swap Instructions to Re-license SAP HANA

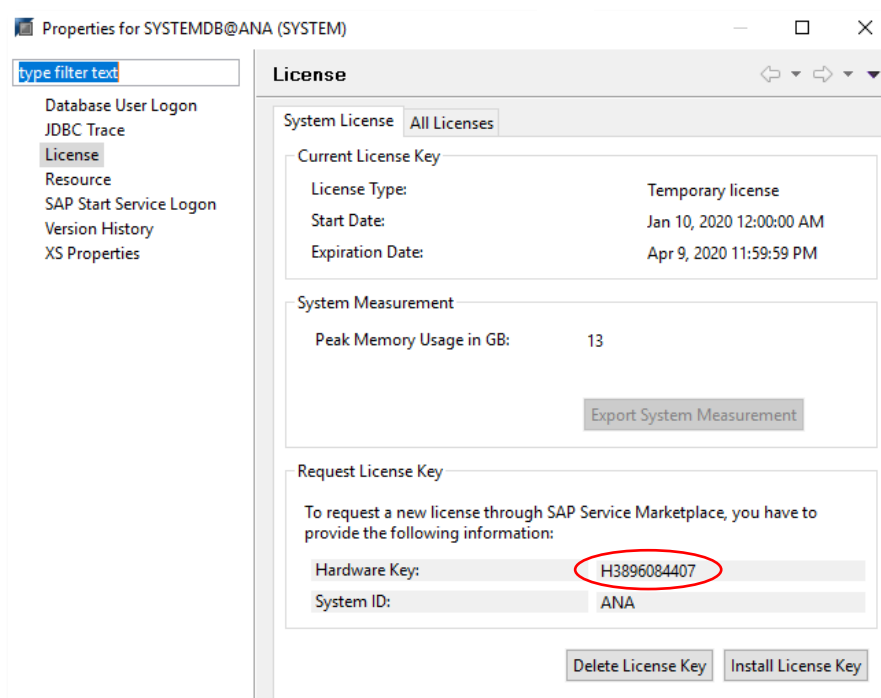

In the event of a hardware swap in the underlying platform, the SAP HANA application may need to be re-licensed, as the Hardware Key is derived based on the MAC address of the first NIC.

In order to determine if SAP HANA needs to be re-licensed, please check if the license is invalid:

- 1.) Open SAP HANA studio.
- 2.) Right click the **SYSTEMDB** and click **Properties**.

- 3.) Click the **License** tab.

- 4.) If the **Hardware Key** has changed after the hardware swap, the **License Type** will show as INVALID, and you will need to re-license.

How to re-license SAP HANA:

- 1.) From the **License** tab, write down the **Hardware Key**.
- 2.) In a browser, go to <https://support.sap.com/en/my-support/keys.html>
- 3.) Login with the S-User ID and follow the prompts.

Add New System

Product: SAP HANA, platform edition ⊗

Version: SAP HANA, platform edition 2.0 ▾

System ID*: ANA

System Name: 00

System Type*: Productive System ▾

Operating System*: Linux ▾

Continue Cancel

- 4.) Add the system and enter the new **Hardware Key**.

Create License Key Request

License Type*: SAP In-memory Appliance platform (en (Remaining = Unlimited) ▾

Hardware Key*: H3896084407

Quantity*: 4 Blocks (256GB) ▾ GB Main Memory

Valid until*: 13-09-2021 📅

Add Reset Cancel

- 5.) Click **Generate**.
